Introduction

This project wants to describe which Italian region is the best equipped to fight the Covid-19 pandemic,to determine the effcience of the response we are going to use the "number of ICUs bed vs region population " parameter.

Data

For this project we will gather data from the following sources

1.Italian city data that contains Regions , City , popultation data and geospatial data.
https://github.com/MatteoHenryChinaski/Comuni-Italiani-2018-Sql-Json-excel
2. Hospital positions from FourSquare
3. Hospital ICUs beds from
http://www.dati.salute.gov.it/dataset/posti_letto_per_stabilimento_ospedaliero_e_disc iplina.jsp
